— ⊕ TRUSTED EVERYWHERE ⊖ —

Made for Convenience • Built to Last

Golf cars are prone to demanding use, frequent service, and off-road vibration damage. This can cause post damage, corroded terminals, loss of charge retention, and increased watering.

**Duracell Golf Car batteries** are built with durability enhancements, reduced maintenance techniques, and electrical short protection designs to safeguard against these golf car specific battery problems.

**Duracell Golf Car batteries** are also designed to deliver superior user convenience. Special manufacturing features significantly reduce time-consuming battery maintenance and expensive watering systems while delivering the industry's most trusted performance.

## BETTER PERFORMANCE PROTECTION

- Fortified internal connections resist performance loss from vibration damage
- Premium glass mat reinforcement protects battery's ability to store energy (less recharging)
- Durable, envelope separators prevent shorting for longer life

## LESS WATERING, LESS MAINTENANCE

- Large reservoir and ultra-pure electrolyte optimizes water utilization
- Special alloy and separator material reduces water consumption
- Hermetic cover to post seal prevents terminal corrosion

## INCREASED SAFETY FEATURES

- Strong, heavy-duty welds ensures critical user safety
- Fortified, solid posts impede post damage, especially from heat
- Reinforced polypropylene case and cover resists breakage under demanding outdoor use

Integrated "twist-and-release" vent cap system releases all vent caps in a single motion making water replacement easier. Also eliminates losing individual vent caps.

## MORE OPTIONS TO FIT YOUR NEEDS

Six-, Eight-, and Twelve-volt options to best meet the needs of a wide variety of Golf Car, Electric Vehicle, Portable Power, or other deep cycle needs.
